### Jinjie Machining Services

#### General Introduction:

We own rich-experienced tech research and development staff members who can make complex map-like products, machined metal parts are made according to customers' specifications. Please feel free to show us your drawings or samples, then we will make what you like. OEM and ODM orders are welcome.

Also available in the company are metrology equipment for measurement and inspection, including conventional as well as high precision instruments, in order to meet the needs of various customers.

The company has established excellent sales channels for customers in various regions all over the world. We sincerely welcome friends and professionals worldwide to come to China and establish business relationships with us, to prosper together and achieve win-win.

#### Machining Services Procedure:

- ▼ Latest drawings and/or product samples are required before quotation, other information is also required (purchase quantity, delivery time, etc).
- ▼ Discuss the basic and unique quality requirements, in order to make all perfect.
- ▼ Calculate the cost and quote the competitive price for YOU.

- ▼ If necessary, redraw the design and assign the task.
- ▼ MANUFACTURING.
- ▼ Production quality assurance during the whole process.
- ▼ Final QC and package.
- ▼ Shipment.
- ▼ Customers documents & logistics.
